

UNIVERSAL SPEAKER STANDS

Klipsch®

ELEVATE YOUR EXPERIENCE

The Klipsch 24" Universal Speaker Stand was engineered to elevate your powered monitor or bookshelf to the perfect listening height. Designed to deliver the most direct sound at 38" (+/- 2") from the floor, you'll get the clearest, most directional listening experience at seated height.

UNIVERSALLY USEFUL

Designed with the future of sound in mind, all 2022 Klipsch powered or passive monitors will feature low profile threaded inserts allowing you to seamlessly secure them to your 24" Universal Speaker Stands. Upgrading your home theater setup has never been easier with the most secure, versatile speaker stands on the market. As you evolve your gaming, music, TV or movie setup, you're guaranteed to find the best stereo image possible with Klipsch.

SLEEK CORD MANAGEMENT

Lines of tangled cords are a thing of the past with your Klipsch Universal Speaker Stand. Cables as thin as speaker wire and as thick as power cables fit through this stylish, contemporary stand. The high quality metal passage is durable, fingerprint-proof, and fits with any décor.

EASILY ADJUSTABLE

These sleek, structured speaker stands are easy to assemble and adjust to perfectly fit your home theater or listening area. The 24" Universal Speaker Stand has been thoughtfully engineered to avoid tipping up to 10-degrees and comes with a handy leveling tool that allows you to expertly adjust the base to your individual space.

DESIGNED FOR ANY SETTING

Great sound shouldn't come with a risk. That's why we designed multi-surface adjustable feet to keep your speaker stands steady on hardwood floor or carpeting. Triangle-tipped rubber feet lock your stand securely into carpet fibers or can be easily replaced with rounded tips for scratch-free placement on hard surfaces. You're just a few twists away from securing your elevated speakers in any room of the house.
