Popular All-In-One Speakers just don't cut it...

- **NO STEREO, NO HIFI**

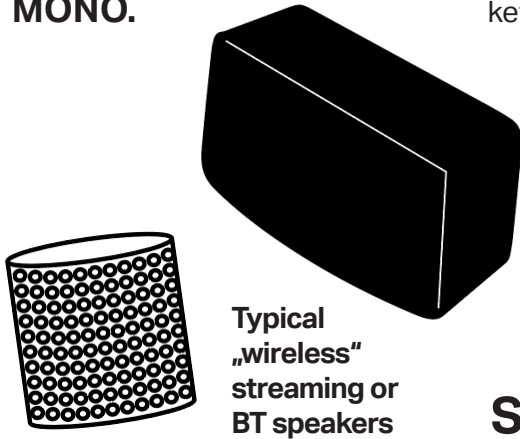

Standard all-in-one systems with speaker, amplifier, and streaming in one cabinet are **MONO**.

- **DIGITALLY ENHANCED**

A small cabinet in plastic does not allow bass. The sound is enhanced by electronics like ketchup does to food.

- **OK FOR BACKGROUND MUSIC**

But **NOT OK** when you want to enjoy music like a **Live-Concert!** For that you need the illusion of a sound stage and also a linear frequency response to hear the instruments as they would sound in real life!

... for the "real deal" you need a **STEREO HIFI SYSTEM with 2 SPEAKERS**

The Colourful Audio System offers it all...

- **TRUE HiFi Stereo**
- **ANALOG** warm sound experience
- **STREAMING** wireless high resolution Bluetooth
- **CONNECTIVITY** to TV, radio, CD player, etc.
- **TIMELESS DESIGN** in beautiful colours
- **25-YEARS** guaranteed spare part availability
- **HANDMADE IN EUROPE**

Colourful Audio System – more than just a pretty face

Debut Carbon EVO

The Debut Carbon EVO focuses on the core aspects that make a turntable sound great. Technically correct design - expert craftsmanship - handmade in the EU.

This turntable is built to last you a lifetime! The heavy and solid MDF plinth with new 8x hand-painted finishes look and feel better than ever before. The new platter, motor-suspension, speed control and height-adjustable feet are small details when taken individually but as a whole they add up and result in a new Debut that does not only sound better than before, but also looks and feels better and more impressive than any Debut ever did, by a long shot.

MaiA S3

The MaiA (My Audio Integrated Amplifier) S3 is the heart of this hifi system. With 8 inputs it is ready for any of source device you decide to pair it up with. It offers a phono RCA input for MM, that is ready for the Debut Carbon EVO and can handle MI or high output MC cartridges if you want to upgrade your cartridge in the future. Three RCA inputs allow line level inputs. You can also connect digital sources like your TV or a CD transport via the coax or optical S/PDIF inputs and use the MaiA S3 DAC with a quality up to 24bit and 192kHz. If you want to stream your music from your mobile phone, tablet or pc you can simply connect to the high definition AptX HD capable Bluetooth 5.0 input.

Speaker Box 5 S2

The Speaker Box 5 S2 is characterized by its spacious and detailed sound. A 25 mm silk dome tweeter delivers crystal clear highs, the 130 mm fibreglass cone gives full-bodied and lush mids as well as punchy and tight bass.

The Speaker Box 5 S2 is manufactured only with the highest quality materials and to 100% in Europe. Only high quality materials were used when Speaker Box 5 S2 was created. A special, resistant and ecofriendly glue has been used to maintain rigidity over the years.

Damp it

Damp it are particularly suitable for bookshelf speakers & prevent the transmission of structure-borne sound from subsonics up to 500 Hz.

Debut Carbon EVO

- Best Buy Audiophile Turntable
- 8,6" carbon tonearm
- Motor suspension
- Height adjustable metal feet

- Bluetooth 5.0 - aptX HD capable (24-bit, up to 48kHz)
- Variable output for subwoofer or second zone amp
- Premium aluminium casework

ALL HANDMADE IN EUROPE

The history of Pro-Ject

Pro-Ject was founded in 1991, during the onslaught of the compact disc and CD players, with the mission to offer the best analogue experience for a reasonable price. In a time where the digital audio media had been on the rise, and vinyl was declared as outdated and dead, Heinz Lichtenegger kept his belief in the simple but best way to enjoy music – turntables.

We aim to get as many people as possible into the wonderful hobby that is HiFi audio and to deliver a real stereo experience for the lowest cost possible. The best way to start is with a proper turntable. We want to give the customers back the right to choose what they need, without overblowing our products with unnecessary features.

Here at Pro-Ject, we strive to create astonishing products with impeccable value. We only use the best components for the price and manufacture our handmade goods solely in Europe. With an eye for future trends, we are always trying to fit the needs of the market.

Our passion and drive have been recognized by many acclaimed magazines. We have won multiple awards from the renowned HiFi press for our turntables and electronics over the years. Our products have also been used in countless TV shows and movies.

With cutting edge technologies and machines, we can create visually pleasing products without losing the eye for the finest details. We closely work with partners from the music industry, such as Universal Music Group (The Beatles), Third Man Records (Jack White), The Rolling Stones, Parov Stelar, or the world-famous Hard Rock Café. Many industry leaders also cooperate with us, like the Vienna Philharmonic Orchestra or Ortofon for their jubilees. With these partners, we create special limited edition products to give our customers even more choices.
